

Enterprise Class Telephony For a Small Monthly Rental

Outsourced Telephony Services for Asia Based Businesses

CloudPBX is a fully featured, hosted IP-PBX service leveraging best-of-breed Linux virtualisation and IP-PBX switching technologies. CloudPBX is based on the powerful **Asterisk IP-PBX** switching software. The CloudPBX feature set combined with its low cost of ownership makes for a superior business telecom solution compared to traditional premise-based PBX systems using older TDM technology.

Our **CloudPBX Base Service** is offered as 10 or 30+ extension bundles. The Base service includes all the functionality required to operate your business including voicemail, music on-hold, and call transfers to name a few, and requires connections to IP desk phones.

Our **CloudPBX Extended Service** includes web browser access to call history and call recordings if enabled. Ideal for managing and supervising sales teams.

In addition, Cloud Solutions offers **virtual phone numbers** from over 50 countries and low cost long-distance calling over premium SIP Trunks. SIP Trunks for local PSTN connections available in Hong Kong, Malaysia, Singapore, Thailand and Japan.

CloudPBX Benefits Include:

- Remote workers and branch offices can connect to a single telephone system so all calls become internal
- Works with smart phones such as iPhone and Android via WiFi and 3G/4G mobile networks
- Offers business disaster recovery when the PBX is hosted outside of your office
- Virtual numbers from Singapore, Hong Kong, Beijing, Malaysia etc can be connected for incoming calls
- Low cost long distance calls to many countries from less than US\$0.02 cents per minute
- HD Voice supported providing crystal clear voice quality, far superior to traditional telephone systems

Enterprise Class Telephony For a Small Monthly Rental

Moreover, because your CloudPBX is hosted in the cloud, you no longer have to buy or maintain any physical telephony hardware or hire an IT person to administer it. Just plug your configured IP phones into your network and start answering customer calls. It is that simple! We ship your IP phones directly to your office and can provide configuration services.

Number Porting Services. For Japan and Singapore number porting services are available allowing you to retain your current numbers. For all other countries permanent forwarding of your current numbers to the CloudPBX will allow you to continue to receive calls on your existing numbers.

CloudPBX Base 10 includes up to 10 extensions and up to 4 SIP trunk connections. This is suitable for most small businesses. Prices in US\$.
